Antigonish County

The County of Antigonish occupies the northeast corner of the mainland portion of Nova Scotia. While the area was first settled in the mid-seventeenth century it was not until 1786 to 1791 that significant numbers of Scottish Highlanders emigrated to the county.

An important part of the cultural background of the county is St. Francis Xavier University, founded in 1853. From its beginning, the university has been deeply involved in programs of self-help for fishermen, farmers and other workers. Out of the efforts of the university's Extension Department, founded in 1928, grew the credit union movement and the co-operative movement. In recent times the principles of self-help expounded by the leaders of the "Antigonish Movement" have been extended to many developing nations through the work of the Coady International Institute, founded in 1959.

Tourism is an important aspect of the economy of the county. In summer the warm water of the Northumberland Strait and the sandy beaches are an attraction while winter activities include skiing at Keppoch.

> area is larger than in other Census year.

Due to the lack of legal or official boundaries, the Census is not always able to distinguish the population of these unincorporated places from that of the surrounding area.

The population totals shown in this report for 1976 and 1981 should thus be considered as approximations.
